Course Admin

"Triple Helix" Exercise

- Complete and everyone submits results survey by ~~1pm~~ 5pm Tuesday

Next Class: Coalitions

- Do "Triple Helix" & report results
- Read "Saudia Arabia of Sashimi"
- Watch 3 short video lectures re coalitions

"Make It Your Own (MIYO)" Final Project

- Due EOD Thursday December 11

5

Home of LBJ's "Little Congress"

6

The Boss of the Little Congress

LBJ's power & influence accreted

- Gradual process, the product of many, many steps

He was a trader

- Reciprocity. Willing to taker others into his debt, settling up over time (in the next deal, or the one after) rather than getting his share each time.

He was incredibly flexible

- We see evidence of expert power, capture organizational processes, and a wide range of influence tactics: allocentrism, exchange, coalition-building, networks, might, pathos ("Mah Republican")

He was long on smart power

- Highly focused on his goals, reads situations well, bends circumstances

7

LBJ

We might find the tactics odious (though instructive in the pureness of their form)…

8

LBJ

…but what if used to achieve great things?

9

A mini-documentary
(courtesy Sora/Elaine Vernoff)

10

Leverage Inventory

The overarching point

- There are multiple approaches…
- …and the most successful influencers draw on a wide range of them.
- Doing so is even more important as you advance

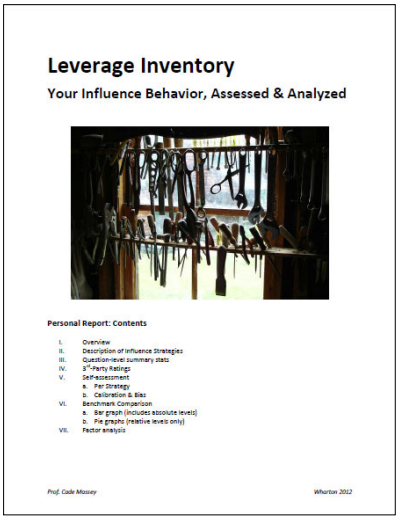

Most of us have "go to" moves

- Purpose: Help you round out your influence toolbox

11

Can we assess influence behavior?

Builds on common framework (e.g., Hay Group, McKinsey)

Developed working with MBAs & MBA-Es for ~15 years.

Tested with 3,000+ students from Yale, Penn, NYU, Columbia, UT-Austin & UCSD.

12

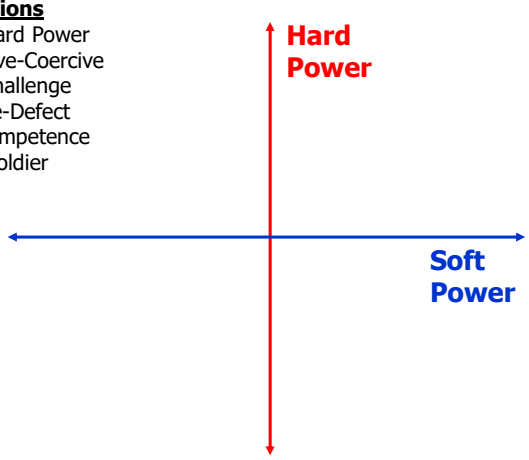

Assessing current fitness, not fixed traits

13

Traditionally 2 types of power

Some Manifestations
Political Science: Soft-Hard Power
Org Behavior: Collaborative-Coercive
Education: Support-Challenge
Economics: Cooperate-Defect
Psychology: Warmth-Competence
Sikhism (!): Saint-Soldier

14

Joseph Nye, Political Scientist

America's power - By invitation

The new Rome meets the new barbarians

The United States is likely to be the world's top power for many years. This brings challenges that it should not try to face alone, writes Joseph Nye

Mar 21st 2002 | CAMBRIDGE, MASSACHUSETTS

The Economist

"Throughout history, coalitions of countries have arisen to balance dominant powers, and the search for traditional shifts in the balance of power and new state challengers is under way."

"While potential coalitions to check American power could be created, it is unlikely that they would become firm alliances unless the United States handles its hard coercive power in an overbearing unilateral manner that undermines its soft or attractive power – the important ability to get others to want what you want."

Hard Power

Soft Power

15

Jeff Pfeffer, Organizational Scholar

Organizing Pfeffer's Traits

Two broader qualities, both of which are important to acquiring & maintaining power in organizations

- **Capacity to garner support & allies**
  - Sensitivity to others
  - Flexibility
  - Ability to submerge ego and get along

- **Ability to survive in competitive arena**
  - Energy & physical stamina
  - Focus
  - Ability to tolerate conflict

Soft Power

Hard Power

16

Let's ask the data, via Factor Analysis

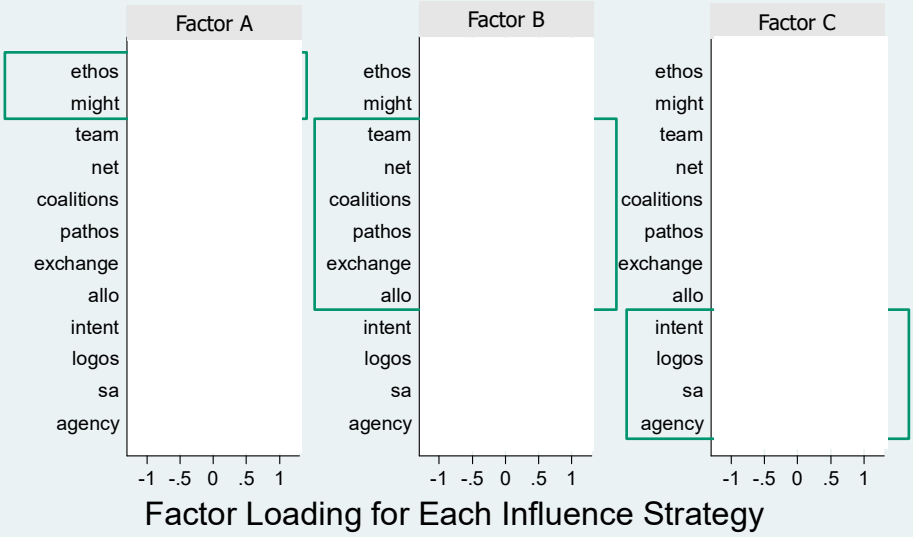

Statistical technique to reduce the dimensionality of data.

- Distill 12, or 20, attributes into just 2 or 3.

Does this by finding patterns in the data that allow us to optimally differentiate the people (products/countries/cells/whatever) we're analyzing.

17

Leverage Inventory Factor Structure

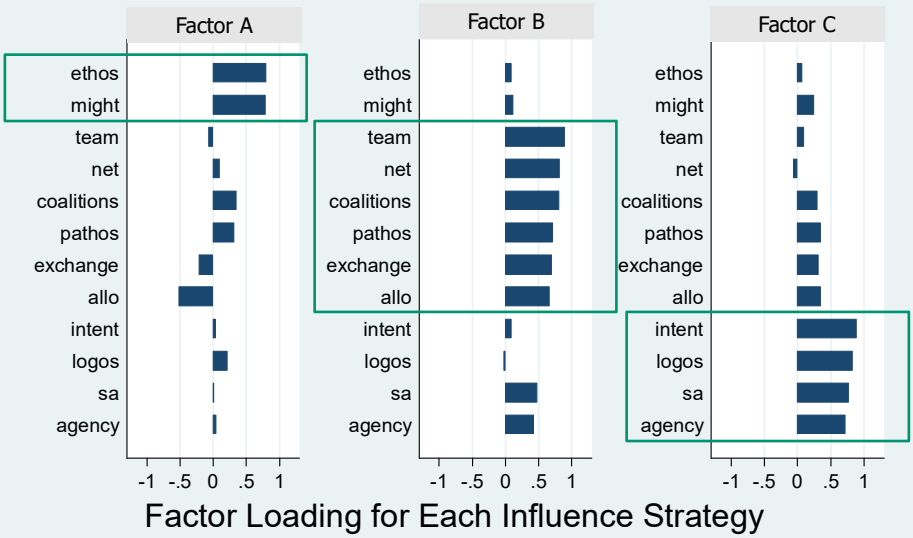

Factor Loading for Each Influence Strategy

Weights are same for all IDs.

18

Leverage Inventory Factor Structure

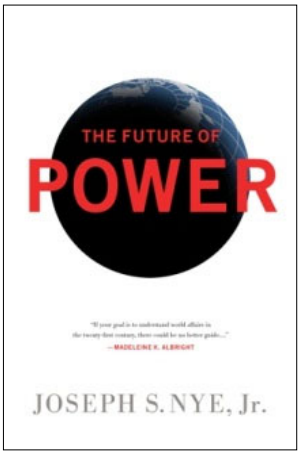

Weights are same for all IDs.

19

Joseph Nye, Political Scientist

Secretary of State Clinton, confirmation hearings:

"We must use what has been called smart power, the full range of tools at our disposal -- diplomatic, economic, military, political, legal, and cultural -- picking the right tool or combination of tools for each situation."

20

The Three-Factor Model of Influence

Hard Power

- Might – Willing to use coercive power and tolerate conflict.
- Ethos – Establishes credibility through credentials and character.

Soft Power

- Pathos – Conveys message with emotional resonance.
- Networks – Cultivates a broad, disparate set of informal relationships.
- Coalitions – Identifies and obtains key supporters, esp. "across the aisle".
- Team-building – Build groups, prioritizes cohesion.
- Allocentrism – Seeks to understand others and their preferences.
- Exchange – Solicits and accepts quid pro quo and reciprocity.

Smart Power

- Logos – Uses logical reasoning, expertise and data.
- Agency – Shapes situations, challenges status quo.
- Intentionality – Sharply focused on reaching most important goals.
- Situation Awareness –Sensitive to critical environmental factors, changes.

21

Results – Construction details/reminder

Response scale

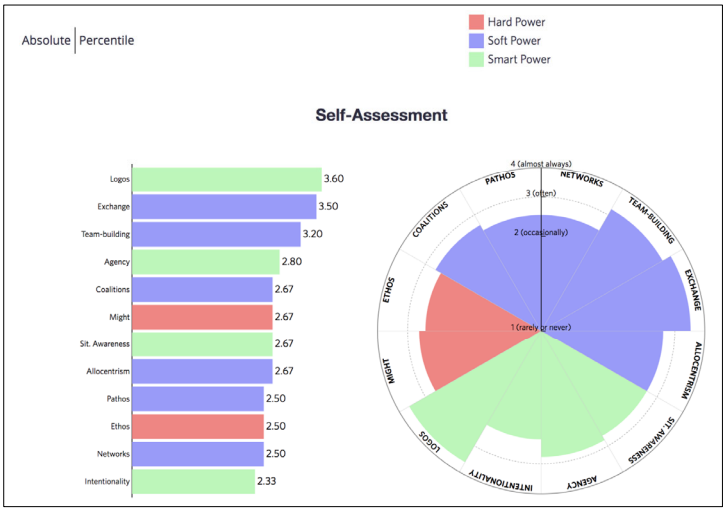

- 1 = Rarely or Never
- 2 = Occasionally
- 3 = Often
- 4 = Almost Always

4-6 questions per strategy

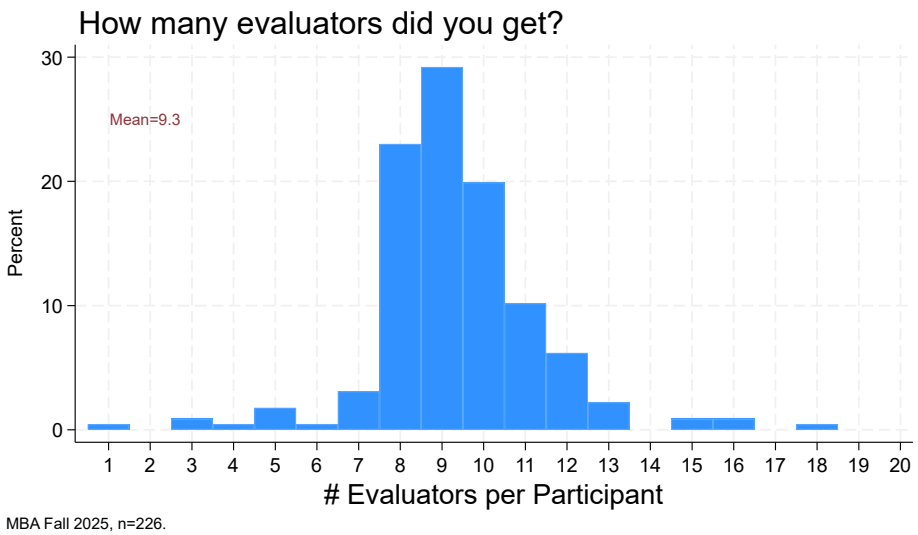

- So, we report averages (1-4) for each strategy

22

29

But how are these tactics related to actual influence?

30

Performance

A battery of questions intended to measure a person's influence. This is the dependent measure for some of our analyses. Important to hold constant / control for level of responsibility, technical skill, etc.

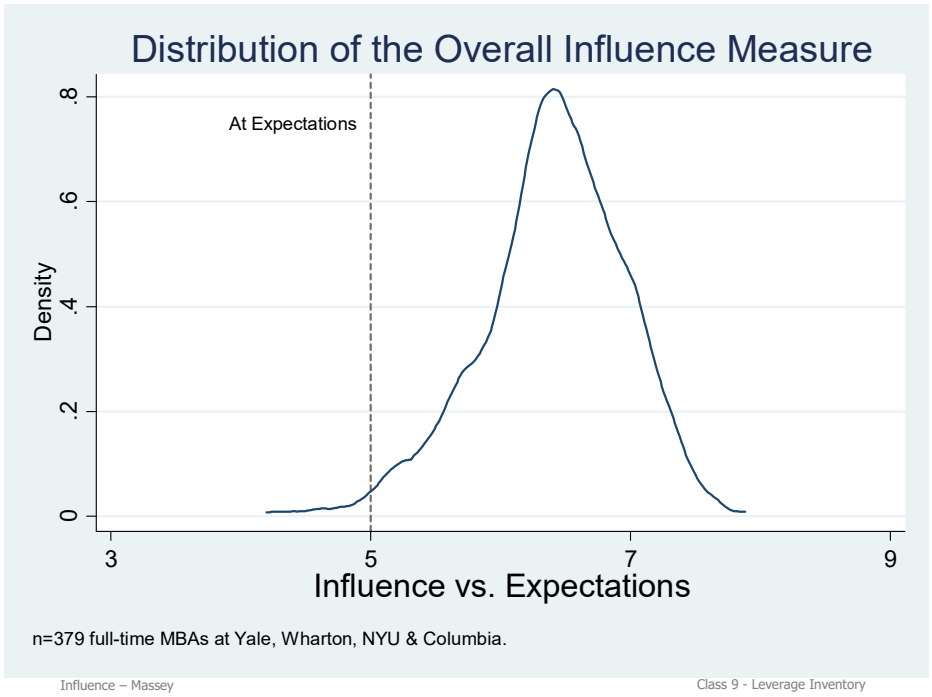

Survey questions:

How much does (or did) his/her work influence the organization?
Compared to others with similar technical skills, how much impact does (or did) his/her work have?
To what extent are the organization's activities different because of his/her contributions?
Compared to others in similar positions, how much weight does (or did) his/her opinion have?
Compared to others with similar responsibilities, how much power does (or did) he/she have in the organization?

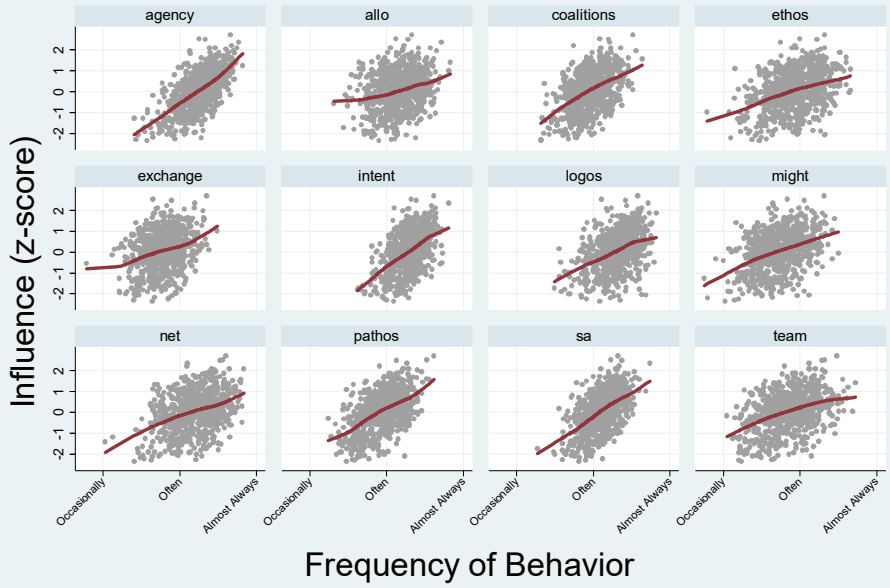

9-point response scale:

- Much less than expected – Much more than expected

31

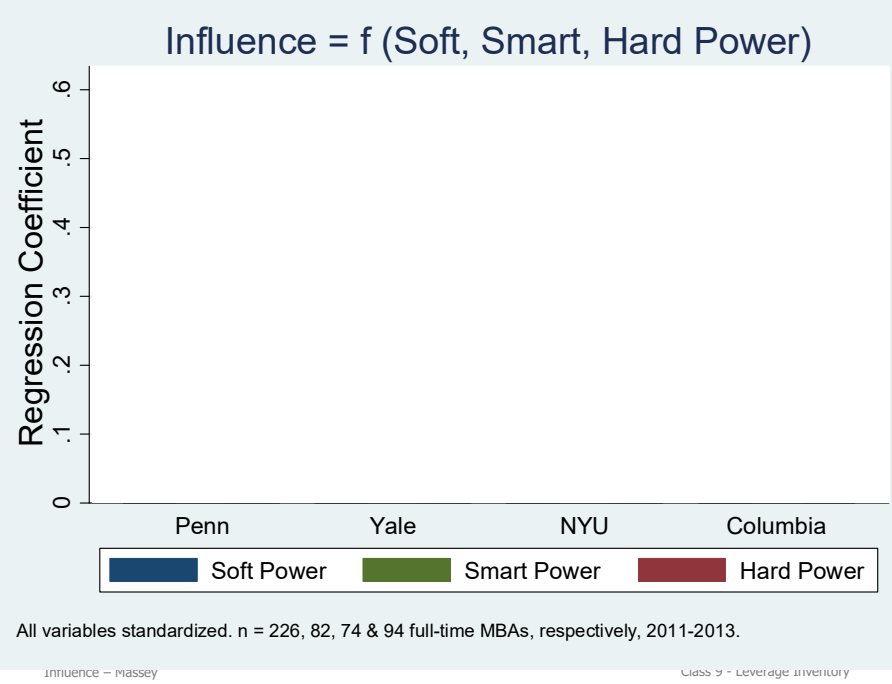

32

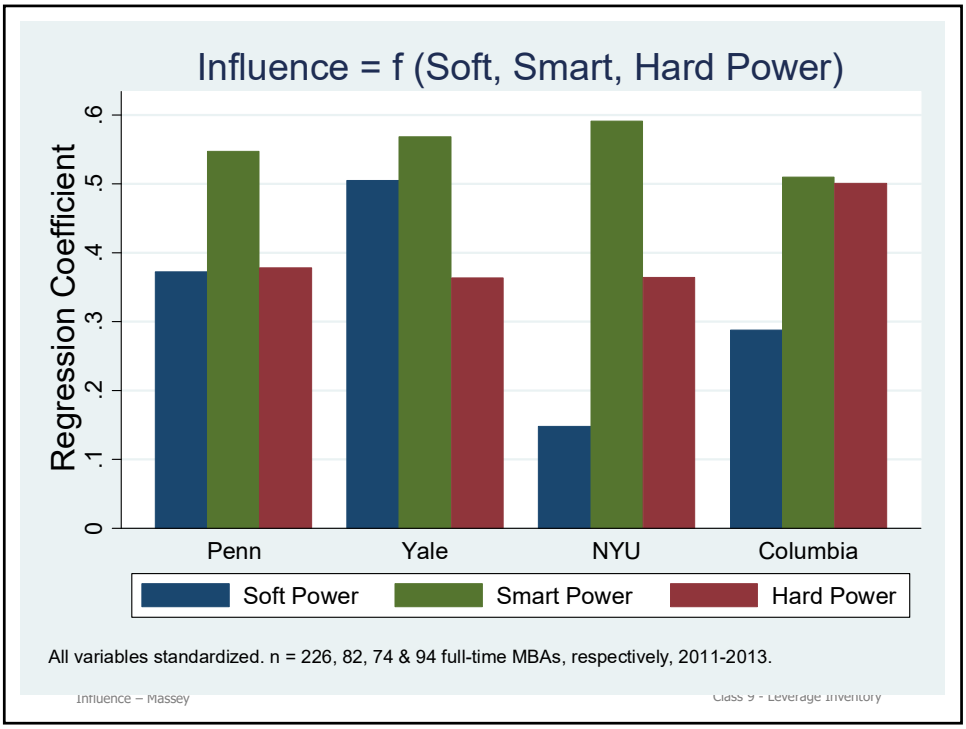

Leverage Inventory, 3rd-party evaluations. n=851 MBAs and EMBAs.

<u>44</u>

45

Now what about changing your influence behaviors?

46

My advice re what to work on

One thing at a time!
- As narrow and concrete as possible.

Set yourself up for success
- Pick something you really want to work on

There is no prescribed order or universal priority
- Depends on your goals and environment

Might consider the tails (your best and worst)
- You all need a world-class skill you can rely on
- A major gap tends to be a perennial tripping hazard

47

Workshop one leverage inventory tactic

Starting place

Measurement
- Where are you presently?
  - What did you think pre-assessment?
  - What do you think now?

External factors
- How has your work situation affected your use of this tactic?
- How has your personal history affected your use of this tactic?

Desired place

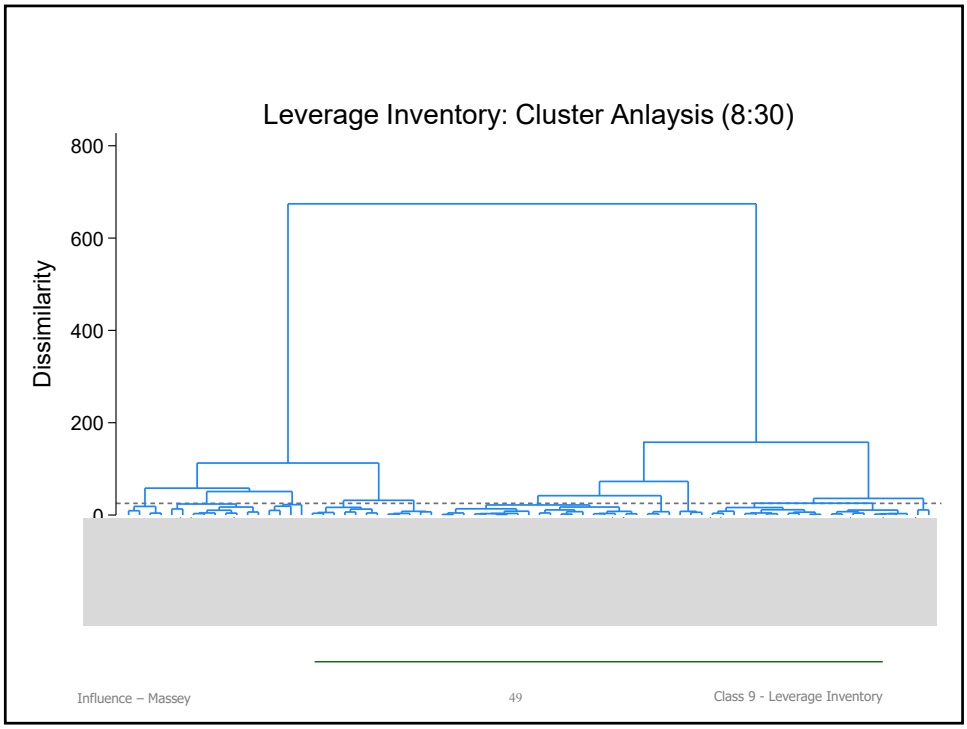

What level do you want to be at?

Who is an example of someone in your life at this level?

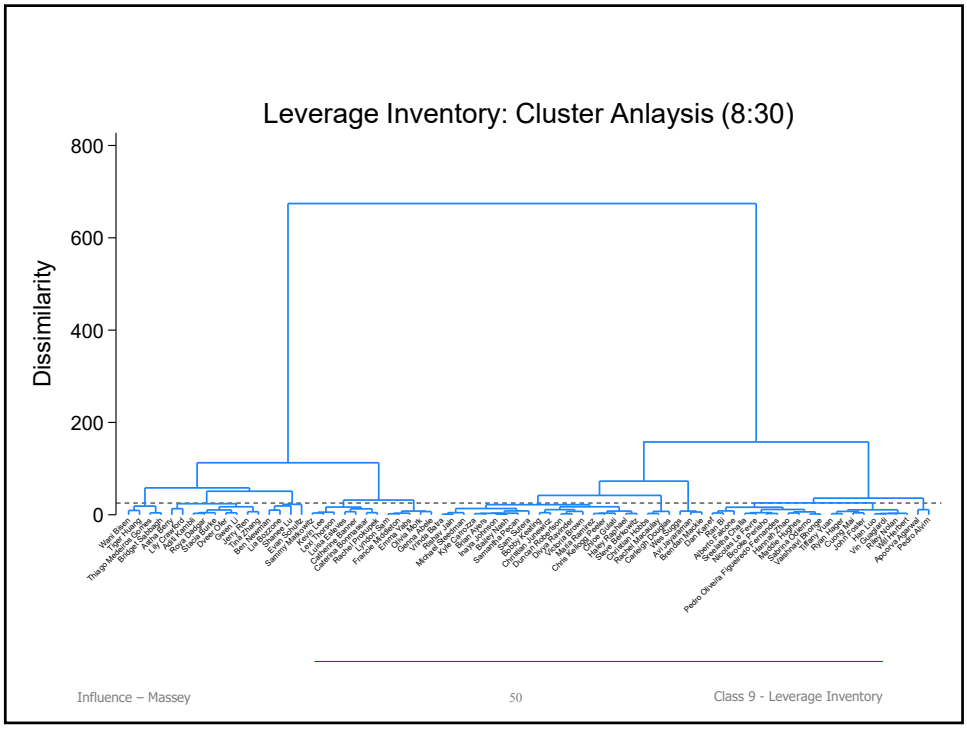

What do you most need to do differently in order to make progress?

What is one concrete step you can take in the immediate future?

55

Resources available on-line

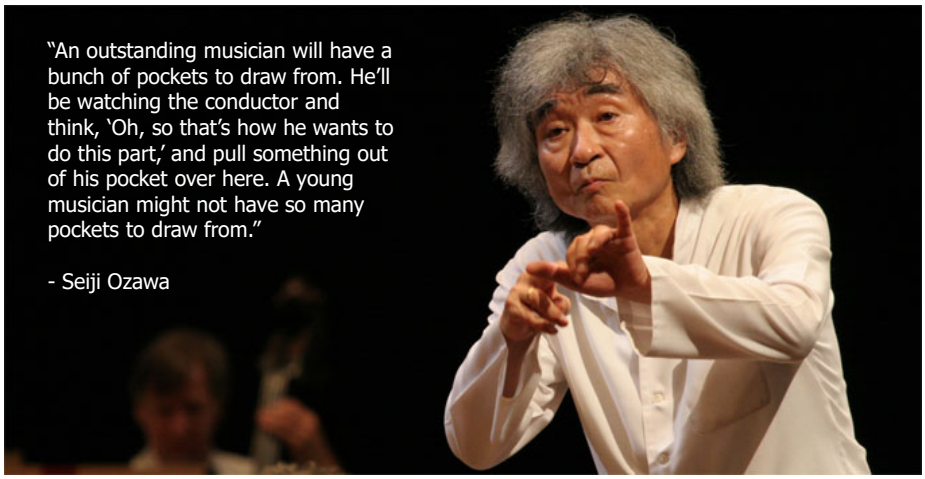

56

Closing Thoughts (1 of 4)

Importance of being "multiple"

- Flexibility – situations vary, obviously
- Balance – e.g., pathos offsets logos, team-building offsets might, etc.

57

58

Closing Thoughts (2 of 4)

Importance of being "multiple"

- Flexibility – situations vary, obviously
- Balance – e.g., pathos offsets logos, team-building offsets might, etc.

The under-appreciated role of "smart power"

- Informs when, where, why & how to use hard & soft power

Influence behavior is malleable

- Largely habitual, unthinking
- Feedback gives you the chance to choose/change your behavior

59

Closing Thoughts (3 of 4)

Power accretes, through habits and layers

- "Building a power base is a process of accumulating leverage and resource control little by little over time." (Pfeffer, p96)
- "There is only one way to become more effective in building power and using influence: practice." (p15)
- "Just like the principle of compound interest, becoming somewhat more effective in every situation can, over time, leave you in a very different, and much better, place." (p17)

60

Closing Thoughts (4 of 4)

What's vital is learning from experience.

"Many people who think they have 20 years of experience really don't – they have just one year of experience repeated 20 times."

- Jeffrey Pfeffer (2010, p 49)

61

Appendix

62

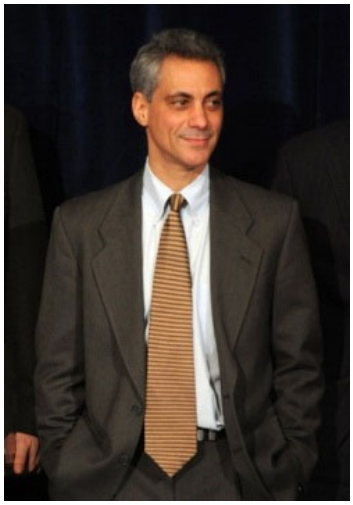

Even Rahm is Malleable…

Jonathan Alter, The Atlantic, 4/1/2012:

"Don't stereotype me for how you knew me when I was 24, when now I'm 51 and I'm a different person and I'm a more mature person. Okay? Don't write within your stereotypes. Okay? I'm smarter about the pitches I have to swing at. When I grew up, I had to swing at them all."

He cites several examples to prove he knows that, as Ted Kennedy liked to say, "Honey works as well as vinegar," from courtesy calls to labor leaders who opposed him, to what he says is the first-ever reception hosted by a Chicago mayor in honor of Springfield legislators.

"He's always known when to step on the gas, but he's developed the ability to throttle down and work circuitously rather than running through walls," says David Axelrod.

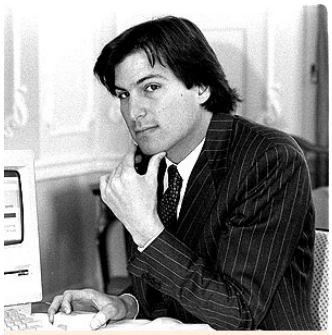

…and Jobs

"Steve Jobs' fastidiousness and attention to detail were legendary – as was his irascibility. But Ed Catmull, co-founder and president of Pixar, says he also had a capacity to change. 'I think there are misconceptions about Steve which have been coloured by his earlier behaviour.

"'What people missed was that Steve was so smart that he realised a lot of those things weren't working well for him and he altered his behaviour. So for the last 15 years of his life the same people stayed with him. People can change and he's a demonstration of that.'"

Financial Times, June 25, 2014

Steve Jobs in 1986, the year he bought Pixar out of Lucasfilm

"Soft Power" Behaviors (p1 of 2)

Allocentrism
- Cultivates the support of others by involving them in the decision-making process.
- Tries to understand what issues are really motivating the other person.
- Adapts own ideas by accepting suggestions from others.
- Listens attentively when others talk.
- Asks questions in order to better understand the other person.
- Looks for solutions that will benefit all parties involved.

Networks
- Cultivates relationships before they are needed for a particular purpose.
- Maintains professional contacts at multiple levels in the organization.
- Maintains relationships with those in organizations he/she is no longer a part of.
- Maintains relationships that span disparate groups.
- Actively seeks new people to incorporate into his/her professional network.
- Makes an effort to become friends with colleagues at work.

Coalitions
- Gathers support from different parts of the organization.
- Works to address potential tensions with key people prior to the decision point.
- Finds ways to communicate who else is supporting his/her approach.
- Enlists the support of individuals, one by one, in order to build support for an idea.
- Seeks to understand which people are likely to influence a decision.
- Identifies existing coalitions and works through them.

65

"Soft Power" Behaviors (p2 of 2)

Exchange
- Offers rewards to people for compliance.
- Finds ways to make concessions in order to encourage others to do the same.
- Thinks of rewards to offer others to obtain their support.
- Supports mutual compromise when facing strong resistance.
- Offers to do things for others in return for their support.
- Understands the need to help others in order to get help from them.

Pathos
- Tailors communication content and style to the specific audience.
- Finds and uses concrete examples in order to present his/her case.
- Finds ways of communicating that arouse emotion.
- Finds interesting ways to present information or ideas.
- Uses stories to help make my points.
- When presenting ideas to others, thinks about how to say things, not just what to say.

Team-building
- Prioritizes group cohesion.
- Builds excitement around the essence of the group.
- Makes appeals to values or principles shared by those in our group.
- Works to connect those who seem distant or separate to the group.
- Helps articulate an inspirational vision for the group.

66

"Hard Power" Behaviors

Might
- Is able to tolerate conflict.
- Lets people know when they perform below expectations.
- Is willing to confront difficult people-related issues.
- Stands up for his/her opinion.
- Is willing to use the authority of his/her position to get others to do what he/she wants.
- Is comfortable enforcing negative consequences when appropriate.

Ethos
- Presents ideas with confidence.
- Finds ways to convey his/her credentials and expertise.
- Makes his/her efforts and accomplishments known.
- Communicates how his/her background is relevant to the topic at hand.

67

"Smart Power" Behaviors

Agency
- Creates new alternatives.
- Shows initiative in taking on work.
- Acts before being asked to.
- Considers how a situation can be improved.
- Works beyond explicit job expectations.

Situation Awareness
- Is sensitive to how situations vary in their importance.
- Recognizes when circumstances change.
- Sees opportunities that others miss.
- Recognizes when uncertainty is high.
- Analyzes situations from multiple perspectives.
- Maintains a broad perspective, considering many factors and constituencies.

Intentionality
- Is intentional in the way he/she allocates time and resources.
- Willing to trade minor goals to achieve major goals.
- Is careful to understand the steps necessary to achieve goals.
- Works with a specific purpose in mind.
- Stays on track despite potential distractions.
- Is resilient in the pursuit of goals.

Logos
- Finds ways to make points as simply as possible.
- Uses arguments that are well reasoned.
- Relies on facts and data to convince others.
- Gathers data to support his/her position.
- Appeals to logic to convince others of ideas.

68

Leverage Inventory – Tests/Validation

Scales are reliable

- Alphas range from .70 to .85

Scales are unique

- Intra-class correlations are reliable

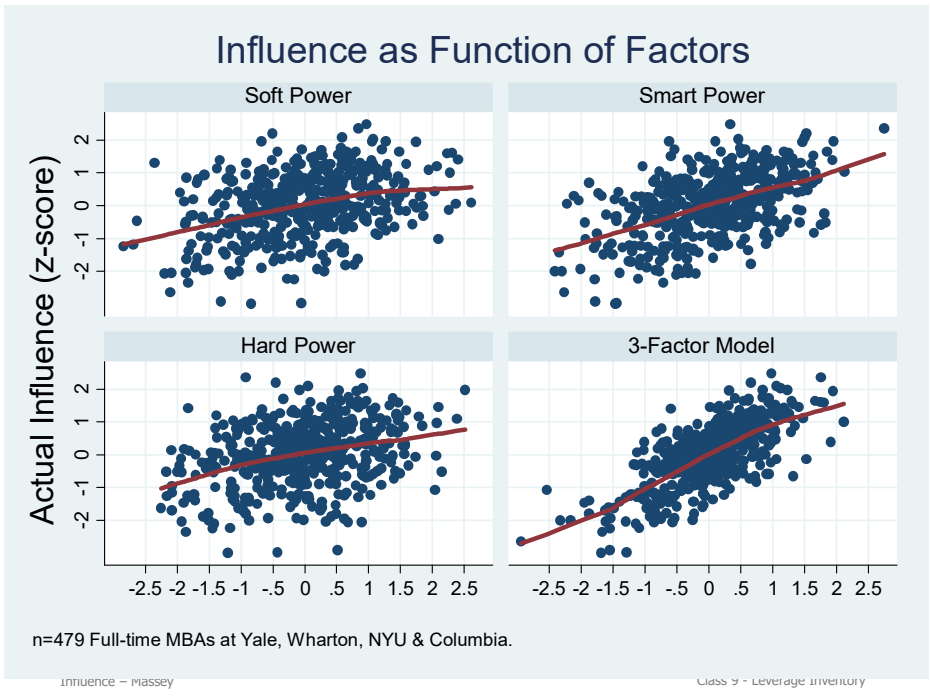

Behavioral measures are related to influence ratings

- Each individual scale is reliably positively related
- Factors are reliably positively related

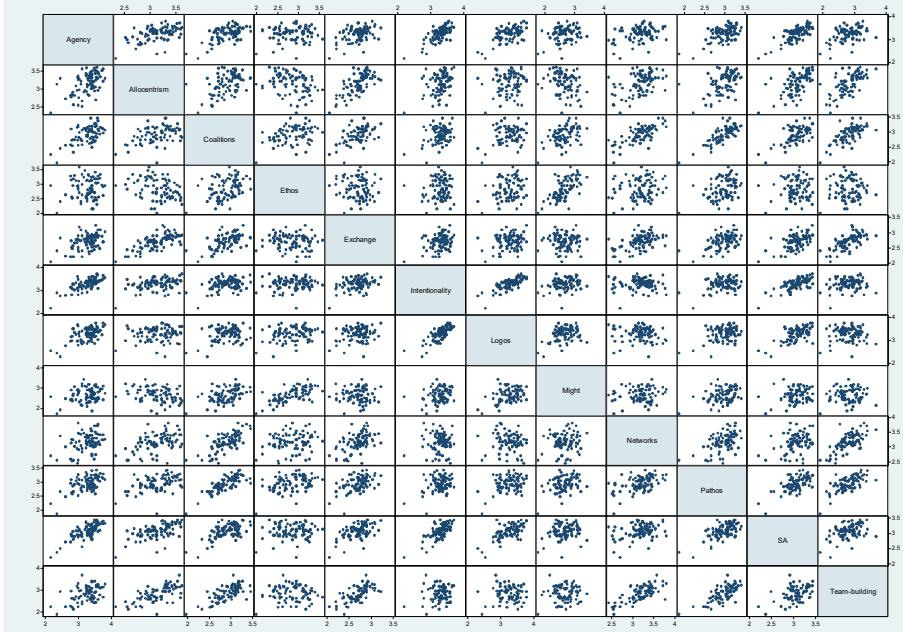

Cross-rater validity

- Behavioral ratings of half a student's raters are positively related to the influence ratings of the other half

72

n=108. 2013 Wharton MBAs.

73

Strategy: Allocentrism

The opposite of ego-centrism. An other orientation. Actively seek others' interests, and considers their preferences.

Key concepts/references

- Empowerment, collaboration
- Empathy / Pfeffer's "sensitivity to others"
- Ury & Fisher (Getting to Yes)

Survey questions:

Looks for solutions that will benefit all parties involved.
Tries to understand what issues are really motivating the other person.
Cultivates the support of others by involving them in the decision-making process.
Adapts own ideas by accepting suggestions from others.
Asks questions in order to better understand the other person.
Listens attentively when others talk.

74

Strategy: Exchange

A willingness for quid pro quo, a preference for going beyond it.

Key concepts/references

- Reciprocity (Cialdini)
- Axelrod ("tit for tat")

Survey questions:

Thinks of rewards to offer others to obtain their support.
Offers rewards to people for compliance.
Offers to do things for others in return for their support.
Finds ways to make concessions in order to encourage others to do the same.
Understands the need to help others in order to get help from them.
Supports mutual compromise when facing strong resistance.

Strategy: Might

A willingness to use coercive power. More generally, an ability to address difficult issues and tolerate conflict.

Key concepts/references

- Pfeffer
- French & Raven ("coercive power")

Survey questions:

Is willing to use the authority of his/her position to get others to do what he/she wants.
Stands up for his/her opinion.
Is comfortable enforcing negative consequences when appropriate.
Lets people know when they perform below expectations.
Is able to tolerate conflict.
Is willing to confront difficult people-related issues.

Strategy: Networks

Cultivating a broad, disparate set of informal relationships.

Key concepts/references

- "Structural holes"
- Burt, Granovetter

Survey questions:

Makes an effort to become friends with colleagues at work.
Actively seeks new people to incorporate into his/her professional network.
Maintains relationships that span disparate groups.
Cultivates relationships before they are needed for a particular purpose.
Maintains professional contacts at multiple levels in the organization.
Maintains relationships with those in organizations he/she is no longer a part of.

Strategy: Coalitions

Identifying – and getting the support of – key people.

Key concepts/references

- Social influence / proof (Cialdini)
- Animal behavior (e.g., de Waal)
- "The meeting before the meeting"

Survey questions:

Finds ways to communicate who else is supporting his/her approach.
Seeks to understand which people are likely to influence a decision.
Gathers support from different parts of the organization.
Enlists the support of individuals, one by one, in order to build support for an idea.
Identifies existing coalitions and works through them.
Works to address potential tensions with key people prior to the decision point.

Strategy: Team-building

Builds groups, prioritizes cohesion.

Key concepts/references

- Organizational culture
- Socialization

Survey questions:

Builds excitement around the essence of the group.
Takes advantage of meetings and correspondence to build pride in our team.
Helps articulate an inspirational vision for our group.
Makes appeals to values or principles shared by those in our group.
Prioritizes group cohesion.
Works to connect those who seem distant or separate to the group.

79

Strategy: Logos

Using logical reasons, expertise or data to convince or persuade others.

Key concepts/references

- Rhetoric (Aristotle, Cicero)

Survey questions:

Finds ways to make points as simply as possible.
Appeals to logic to convince others of ideas.
Gathers data to support his/her position.
Relies on facts and data to convince others.
Uses arguments that are well reasoned.

80

Strategy: Pathos

Convey messages in a way that has emotional resonance.

Key concepts/references

- Rhetoric (Aristotle, Cicero)
- "Sticky ideas" (Heath & Heath)
- Presentation Zen

Survey questions:

Finds ways of communicating that arouse emotion.
Uses stories to help make my points.
When presenting ideas to others, thinks about how to say things, not just what to say.
Finds interesting ways to present information or ideas.
Tailors communication content and style to the specific audience.
Finds and uses concrete examples in order to present his/her case.

Strategy: Ethos

Establishing personal credibility through credentials, commonality and "decorum", i.e., meeting others' expectations.

Key concepts/references

- Rhetoric (Aristotle, Cicero)
- Similarity, Authority (Cialdini)
- Expert power (French & Raven)

Survey questions:

Presents ideas with confidence.
Makes his/her efforts and accomplishments known.
Finds ways to convey his/her credentials and expertise.
Communicates how his/her background is relevant to the topic at hand.

Strategy: Agency

Shapes situations. Influences circumstances to suit needs, challenges status quo, accepts nothing as fixed.

Key concepts/references

- Initiative, control
- Sociological research on "rule breakers"
- E.g.: Moses, Janette Sadik-Kahn, LBJ

Survey questions:

Creates new alternatives. Considers how a situation can be improved. Acts before being asked to. Works beyond explicit job expectations. Shows initiative in taking on work.

83

Agency

E.g., Janette Sadik-Khan, NYC Transportation Commissioner

Most influential Transportation Commissioner since Moses.

#1 most important strategy, empirically.

84

Strategy: Intentionality

Acting with a goal in mind. Relentless pursuit of goals, eschewing distractions and secondary rewards.

Key concepts/references

- Persistent, strategic, guided
- Pfeffer's "focus"
- Psychological research on goals
- E.g.: Moses, LBJ, Sergio de Mello

Survey questions:

Willing to trade minor goals to achieve major goals.
Works with a specific purpose in mind.
Is careful to understand the steps necessary to achieve goals.
Is intentional in the way he/she allocates time and resources.
Is resilient in the pursuit of goals.
Stays on track despite potential distractions.

85

Intentionality

E.g., Sergio de Mello, late UN ambassador.

Sergio was "ruthlessly pragmatic."

With experience, "he learned to trade lesser evils."

If you're not making trade-offs, you're not working toward a goal.

86

Strategy: Situation Awareness

Attends to situational power, uncertainty and importance, especially how these factors change over time.

Key concepts/references

- Terminology/construct from military and aviation
- Psychological research on change blindness, change detection.
- E.g.: Cuban Missile Crisis

Survey questions:

Recognizes when circumstances change.
Recognizes when uncertainty is high.
Is sensitive to how situations vary in their importance.
Sees opportunities that others miss.
Analyzes situations from multiple perspectives.
Maintains a broad perspective, considering many factors and constituencies.

87

Situation Awareness (SA)

E.g., Abraham Lincoln

Used multiple lenses to understand a situation.

Knew when to wait and when to double down.

SA means staying vigilant for changes in circumstances – risk, uncertainty, importance.
